

Household Hazardous Waste

AB 2481 – Waste Transportation and Acceptance Waiver

California regulations allow a family member, acquaintance, “good Samaritan”, or “proxy” to transport household hazardous waste to a collection facility or temporary collection event on behalf of a household that resides in the collection agency’s jurisdiction. Individuals transporting waste on behalf of another person are still subject to standard household hazardous waste transportation restrictions including load size, safe material transport procedures, and collection appointment schedules.

Please read the following carefully and sign on the line below:

“I certify that I am transporting this waste on behalf of an individual unable or unavailable for circumstances including but not limited to death, illness, or disability and I certified that I am not receiving compensation for this transport nor am I am paid by an organization, for profit or not-for-profit, that provides household hazardous waste transportation services.”

Thank you for using San Mateo County’s Household Hazardous Waste program.
